

Para Hoja de PJ Symbols v5 - diagnostic + reference

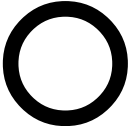

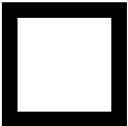

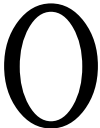

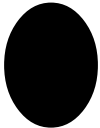

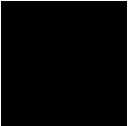

Candidate for owner visual review. v4 remains preserved as a rejected visual candidate; v5 is the corrected successor.

1. **A-E/a-e = exact historical v1 contours and historical meanings.**
2. f-m + v/V + x/X + z = new glyphs drawn in the v1-derived heavy language.
3. n/o/p/P/O = historical A-E concepts redrawn in the v3-derived geometric language.
4. q-u + w/W + y/Y + Z = new glyphs in the v3-derived geometric language.
5. Extended icons exist in both design languages through style-specific PUA ranges.
6. **Single check is now a conventional checkmark; double check is two normal checks STACKED vertically.**
7. **Fillable/container shapes have precomposed /, backslash, X, *, +, -, check and dot variants.**
8. **Ordinary digits 0-9 and common punctuation are present as normal keyboard characters.**
9. C/D retain the historical non-uniform oval. h/H is the additional uniform v1-style oval; p/P is the v3-style oval.
10. Renderer data stores semantics, not keyboard or PUA characters. PUA is rendering-layer API only.

The next pages are intentionally large and sparse: this is an inspection document, not a compact catalog.

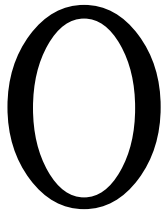

Historical v1 A-E vs v3-derived reinterpretation

Left column is exact 2007 geometry. Right column is the corresponding v3-derived geometric concept.

	v1 exact	v3-derived	meaning
A/a			round outline
B/b			square outline
C/c			historical narrow oval outline
D/d			historical narrow oval filled
E/e			square filled

Oval family - historical, additional uniform, and v3-derived

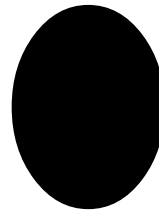

The new uniform oval is retained, but it no longer replaces C/D.

v1 historical outline

C / c

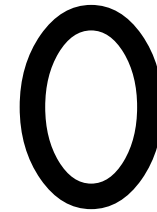

non-uniform historical contour

v1 historical filled

D / d

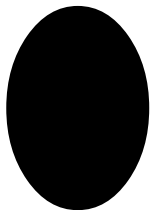

same historical silhouette

v1-style uniform outline

h

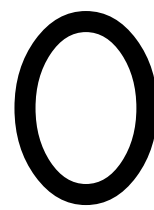

additional useful oval

v1-style uniform filled

H

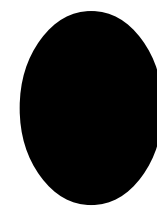

additional useful oval

v3-style oval outline

p

geometric reinterpretation

v3-style oval filled

P

geometric reinterpretation

v1-derived new core glyphs

Human keyboard aliases. Lowercase = outline/empty; uppercase = filled/active for paired shapes.

f/F			circle
g/G			square
h/H			uniform oval
i/I			diamond
j/J			triangle
k/K			hexagon
l/L			star
m/M			pip

v3-derived geometric core glyphs

n/o/p/P/O carry the v3 reinterpretation of historical A-E concepts; q-u add new paired shapes.

n/N			circle
o/O			square
p/P			oval (C/D concept)
q/Q			diamond
r/R			triangle
s/S			hexagon
t/T			star
u/U			pip

Checks, expertise and status - both design languages

Each single mark is a conventional check. Double-check = two copies of that same check stacked vertically.

v1 single check

v

Competent

v1 stacked double

V

Expertise / Pericia

v1 boxed check

x

checked state

v1 boxed stacked double

X

boxed expertise

v1 cross

z

failure/unavailable

v3 single check

w

Competent

v3 stacked double

W

Expertise / Pericia

v3 boxed check

y

checked state

v3 boxed stacked double

Y

boxed expertise

v3 cross

Z

failure/unavailable

Ordinary keyboard characters

Digits and common punctuation are real glyphs in the font, not specimen labels from Helvetica.

Standard-use aliases

Common Unicode symbols map to the v3-derived forms; a few ASCII composition characters are also present.

 circle outline U+25CB	 circle filled U+25CF	 square outline U+25A1	 square filled U+25A0	 diamond outline U+25C7	 diamond filled U+25C6
 triangle outline U+25B3	 triangle filled U+25B2	 star outline U+2606	 star filled U+2605	 check U+2713	 cross U+2715
 heart outline U+2661	 heart filled U+2665	 double circle U+25CE	 bullseye U+2299	 bolt filled U+26A1	

Ordinary ASCII block also includes 0-9, - _ + = / backslash | . , ; * ! ? # % () [] { } < > @ ^ ~

Keyboard reference - human entry aliases

Renderer code should prefer semantic PUA aliases; these aliases are for convenient manual use and specimen entry.

A/a	v1 exact round outline	x/X	v1 boxed check / boxed stacked double
B/b	v1 exact square outline	z	v1 cross
C/c	v1 exact historical oval outline	n/N	v3 circle outline/filled
D/d	v1 exact historical oval filled	o/O	v3 square outline/filled
E/e	v1 exact square filled	p/P	v3 oval outline/filled
f/F	v1 circle outline/filled	q/Q	v3 diamond outline/filled
g/G	v1 square outline/filled	r/R	v3 triangle outline/filled
